

# DISHWASHER DETERGENTS

**Dishwasher powder** removes grease and dirt. Suitable for users who prefer a variable dosage of detergent. Salt and rinse aid should also be used for the perfect result.

**Dishwasher salt** effectively softens the water and increases the cleaning effect of the detergent. Helps prevent scale build up in the machine, thus it protects and prolongs its life. At the same time, it prevents the scale build up and the formation of dried droplets on the dishes.

**Dishwasher rinse aid agent** an ideal detergent that delivers crystal clear glitter. Perfectly removes water residues. Effective when rinsing. It helps to remove both detergent and food residues from the dishes.
